

Process Details for the 2019 Community Benefit Investments

1. Key impacts

Chronic disease management and wellness services
Behavioral Health / Trauma Informed clinical services & case management
Affordable home ownership and rental housing
Achievement across the education continuum
Entrepreneurship and workforce development
Advocacy and Public Policy issues

2. Structure and Timeline

The process for 2019 will consist of one round that will begin with the completion of an application called a Letter of Intent. Bon Secours will evaluate your Letter of Intent and invite a full proposal for those which hold promise in light of our strategy and process changes. The timeline is as follows:

October 1, 2018: Online portal is open to access the Letter of Intent
<https://bonsecours.com/richmond/community-commitment/partnership-requests>

October 31, 2018: Letters of Intent (LOI) are due

December 19, 2018: LOI Decisions Notification

January 2, 2019 Full Application portal open

February 15, 2019: Full Applications are due

April 12, 2019: 2018 Award Announcements

3. Letter of Intent

The Letter of Intent will require you to submit the basic concept and scope of your proposal, including its impacts, implementation framework, financial scale, depth and nature of its collaboration, depth and quality of stakeholder engagement, and potential for co-investment with other funders. This information will also reveal how your proposal aligns with our Strategic Quality Plan and Community Health Needs Assessment.

The Letter of Intent is an electronic form that helps reveal how your proposal aligns with our Strategic Quality Plan and Community Health Needs Assessment. The information you provide will help our scorers understand the project's impact, implementation framework, financial scale, depth of collaboration, level of stakeholder engagement, and its potential for co-investments with other funders.
